

CAMPUS SOLUTIONS 9.0 INTEGRATION SERVICES

KEY FEATURES OF SAIP

KEY FEATURES

- Affordable cost of implementation and maintenance
- Streamlined business processes
- Extensible to future technologies
- Custom development to fit institutions' needs

IMPLEMENTATION SERVICES FOR SAIP

Higher education institutions are looking for more efficient ways to exchange information between Oracle® PeopleSoft® Campus Solutions 9.0 and their learning management system(s) or other academic systems. Until now, there have been no comprehensive solutions to bridge the information. Oracle's PeopleSoft Enterprise Student Administration Integration Pack (SAIP) delivers a scalable, web services-based interface for sharing academic data and allows integration of student records into the academic system of choice. This offers higher education institutions a more efficient integration and superior management control of the administrative, teaching, and learning systems on campus. As a primary provider, Unicon offers implementation services for SAIP.

Outsourcing the SAIP Implementation

Institutions are finding the need to add and pass information from the student information system to any academic system within the online enterprise. SAIP can help institutions accomplish this need by integrating Campus Solutions 9.0 with learning management or other academic systems. In deciding how to implement SAIP, many institutions realize they lack resources, knowledge, or capacity to successfully deploy the solution. One of the choices to minimize these challenges is to outsource the implementation of SAIP. Reasons institutions choose to outsource the implementation of SAIP include:

- Access to knowledgeable and experienced personnel
- Add capacity to deliver solution in timely manner
- Maximize investment with enhanced productivity

Unicon and Oracle's SAIP enterprise solution eliminate the major challenges that come from integrating student administration systems and learning management systems.

Use Unicon to Deliver the SAIP Solution

Unicon and Oracle became partners with the need to integrate SAIP and the Sakai Collaboration and Learning Environment. Born out of this need was the Sakora Project. Led by Unicon, the Sakora project is the integration component providing the connection between Campus Solutions 9.0 and Sakai through SAIP.

Extending the relationship with Oracle, Unicon is now delivering implementation services for SAIP to integrate Campus Solutions 9.0 with institutional academic systems. These systems include standards-based, major vendor-supplied, and open source learning management systems. Unicon also provides development and customization services between Campus Solutions 9.0 and enterprise applications that do not conform to standards.

IT SERVICES FOR EDUCATION

Unicon, Inc. specializes in providing software consulting services which include the delivery of technology solutions and support, systems integration, and software engineering. The company effectively utilizes open source frameworks, applications, and software to provide enterprise-level portal, collaboration, learning, messaging, and authentication solutions for higher education institutions worldwide.

Unicon is a member of the Oracle Partner Network, a contributing member of the IMS Global Learning Consortium, a Sakai Commercial Affiliate for the community source Collaboration and Learning Environment, and a Jasig Partner and authorized Solution Provider for both CAS and uPortal.

Unicon's Implementation Services for SAIP include:

- Implementation planning
- Activation and configuration
- Testing and validation
- Custom development for new integrations

Unicon understands technology. Since 1993, Unicon has provided learning technology services and solutions to nearly 200 clients, including some of the largest and most prestigious colleges, universities, global publishers, and other Fortune 500 companies. Unicon's commitment to delivering technology solutions and support, systems integration, and software engineering allows Unicon to draw on the company's broad experiences for the purpose of solving clients' challenges. With the right know-how and experience, Unicon plays a critical role in the technology-driven transformation of higher education.

Together Unicon and Oracle Offer Great Value to Institutions

Features of the SAIP include:

- Platform for robust integration designed for lower cost of implementation and maintenance.
- Elimination of need for double entry or re-integrating the two systems every time an enhancement or upgrade is introduced into either system.
- Integration does not break upon upgrade of Campus Solutions 9.0, therefore allowing easier transition to future technologies.
- Continuously sharing and updating information between the student and learning management systems.
- Mapping of courses/sections to learning environments can be done by end users.
- Integration to transfer grades from the LMS to Campus Solutions 9.0.

(Features vary, based on the IMS LISv2 compliancy of the LMS).

Joint Value Proposition

As an Oracle partner for the implementation of SAIP, Unicon is positioned to help institutions take advantage of the SAIP capabilities to offer a desired integration of information between Campus Solutions 9.0 and other academic systems. With SAIP, Unicon's team of experts provides services to integrate the administrative and academic systems that support the education experience.
